YumYum!

OVERVIEW

YumYum! is a platform where people can find great restaurants and deals all around the world.

GOALS

1. Connect people with great local businesses and offer new opportunities.
2. Provide owners more and new customers - both locally (i.e. residents) and globally (e.g. tourists)

SPECIFICATIONS

- Add & Edit & Delete
- Location-Based Search
- Price Indicator: a symbolic indicator for owners (1th users) to have an idea about the general price of the restaurant.
- Ratings: a simple rating system for owners (1th users) to have an idea about the quality of the restaurant.

AUDIENCE

There are two kinds of users (clients): restaurant owners (1th users) and customers (end-users).

RO: User can add his/her own business into the system (via admin's authentication). Then, he/she can edit the business or even delete it.

C: They can browse or search for present and available restaurants in the database.

SUMMARY

Detailed information (components by means of a system breakdown included) will be provided in the next document (SRS).
